The Hunter delegates remained in the hall and nominated him for congress. Edwards will be nominated at the London convention on Monday. The result will be that both Hunter and Edwards will be candidates.

A deadlock was the final result of the balloting, and this caused the bolt.

The eleventh district congressional convention was called for the purpose of selecting a candidate for congress to succeed the late Judge Vincent Boring. It was called to order promptly at 10 o'clock this morning by J. S. Cooper, Somerset.

J. N. Sharp, of Williamsburg, a supporter of D. C. Edwards, of London, was elected temporary chairman, defeating L. B. Denham, also of Williamsburg, a Hunter adherent. The vote stood 183 to 169, showing a decided advantage in Edwards' favor.

BAD WEATHER

For Ten Years Because of Spots On Sun.

Large spots on the sun for some days past have interested astronomers and meteorologists as being the most prominent that have been seen in five years. A group of large spots, with a diameter apparently equal to one tenth of the sun's, appeared a week ago, and is now so plainly visible in the sun's southern hemisphere that, weather permitting, it may be seen by the eye aided by only a piece of smoked or colored glass. This disturbance extends over about 130,000 miles of the solar surface.

Eminent meteorologists, discussing the phenomena, say that bad weather will characterize the next ten years.
